DETAILED ACTION

Examiner's Amendment

1. An Examiner's amendment to the specification and abstract appears below.

Should the changes be unacceptable to the applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. An Examiner's amends the abstract, because the abstract exceeds 150 words and thus it is not in accordance with 37 CFR 1.72.

3. The application has been amended as follows:

In the Abstract, replace the old Abstract with the new Abstract on the following page:

Art Unit: 2143

A system and method for configuring a unique computer name record for an information handling system included in a network of a plurality of information handling systems. The method and system for dynamically generating a unique computer name for each information handling system that is connected to a network of information handling systems includes reading a service tag identifier that uniquely identifies the information handling system, incorporating at least a portion of the service tag identifier to define the unique computer name record; and using a substantially similar boot program to boot the information handling system and the plurality of information handling systems.

DETAILED ACTION

Reasons for Allowance

1. For claim 1, the reasons for allowances have been stated in the prior Office action, dated December 30, 2005.

To restate the Office's position, claim 1's limitation "prior to the boot up of the network of information handling systems" is not shown by the references cited in the prior Office actions. The references of record include Bourke-Dunphy et al. (Pat. No. US 6,449,642, Bourke hereinafter) and French et al (U.S. Pat. No. 6,442,685, French hereinafter). The Office has performed further searches; no prior art references that contains the proper limitation in the context of the claim has been found.

In view of the foregoing reasons, none of the references anticipates the independent claim

1. The claim is not viewed as obvious, because the relevant references do not suggest or teach how or why the computer which has a freshly installed operating system must be booted prior to the boot up of the network.
2. The reasons for allowance for claim 1 apply to other independent claims, for substantively the same reasons.
